Customized Application

Our Custom Application is the process of designing, creating, deploying and maintaining software for a specific set of users, functions or organizations.

When an organization has a specific software need that can't be addressed with commercial off-the-shelf software (COTS), it commissions developers to create custom software

- ▶ Custom software development is the creation of unique technology solutions
- ▶ Custom software development requires a detailed plan.

Such software is designed to specifically address these users' needs better than more traditional and widespread off-the-shelf software can .
