

# Online Grant Management System

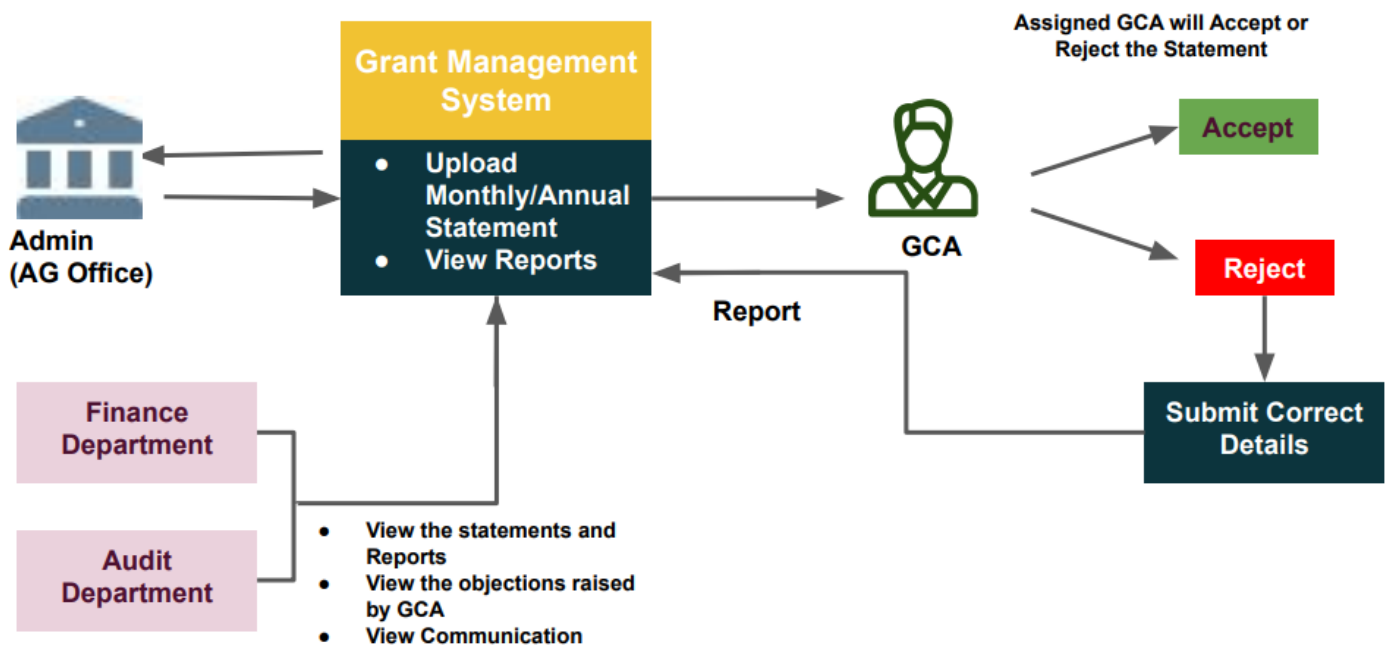

Registered and Corporate Office: - D-190, 3<sup>rd</sup> Floor, Industrial Area phase 8b, Mohali, 160071

+91 9915544433

This System has been developed to facilitate account officers to reconcile the expenditure online. Using this, they can reconcile the grants easier. Earlier, the files were in physical format, and it was troublesome for the department to reconcile files in that format.

We aimed to provide an online platform to reconcile the expenses. We provide them with an online web-based application to make this process easier. The grants are submitted through the Online Grant Management Module, and the Grant Controlling Authority(GCA) manages all the grants. We also provide them with a proper communication facility between Grant Control Authority, Finance Authority, and Treasury Officer.

This system helps in managing and reconciling the grants efficiently. The process is now hassle-free and accurate as this module allows the reconciliation of grants through the web application instead of manually on the paper form.

Flow of Online Grant Management System

## BENEFITS TO THE ORGANIZATION

### **Zero Infrastructure cost**

The proposed solution requires no hardware procurement, is Cost-viable and easy to implement cloud-based solutions.

### **Maintenance-Free**

No need to stress out in case you encounter any software issue; it's our duty to determine the bugs before it reaches you.

### **Hassle-free Installation**

Solution comes with pre-installed applications and ready to use hardware. No-hassle of installation.

### **Enhanced Security**

Our cloud security standards are robust; we follow STRIDE, OWASP & GIGW standards. The application has already obtained Security Audit Clearance Certificate from CERT-IN empaneled company.

### **Cost-effective and Scalable**

Irrespective of the volume of work, our services are scalable as it is intended to expand or shrink as required, the pricing model is usually flexible either per-transaction based or dependent on the number of users.

### **Minimal Implementation Time**

As Soon as the requirements are freezed, the system can be made live in bare minimum time with required customizations. Being a cloud-based solution, implementation is comparatively faster.

### **Customizable**

The solution is highly customizable as per the ground-level requirements. Our core team goes into depth of the existing process and customize the solution to achieve the expected target.

### **Turn Around Time**

The Turn Around Time can eventually be reduced from several months to few days. A huge human effort can be saved by automation of internal office process and hence, minimizing the delay.
