

# Online Examination Application & Result Processing System

Registered and Corporate Office: - D-190, 3<sup>rd</sup> Floor, Industrial Area phase 8b, Mohali, 160071

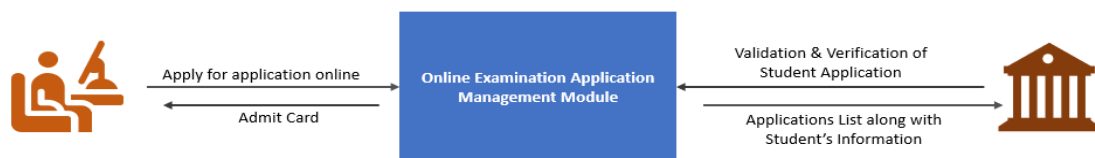

+91 9915544433

The online Exam and Result Processing system is a web-based system which will help in conducting the exams and processing the result online. It consists of two modules basically,

- Online Examination Application Module
- Online Result Processing Module

The **Online Examination Application Module** works as an interface to receive online applications for examination. A combined pay challan of the fee can be generated and this can be paid through online/offline mode.

Admin can verify the applications for exams received through the portal though most of the required validation & eligibility conditions can be applied programmatically at the time of application only. QR Code will display original information available in the system database for verification purposes. This way the invigilator can easily identify tempered admit cards. This module provides a secure and efficient environment to conduct examinations.

**Flow of Online Examination Application Module**

### Features of Online Examination Module

QR verification

Time-saving

Enhanced Security

Precise & Transparent

Paperless

Fast Processing

Cost-effective

Online Payment facility

Correspondingly, **Exam result processing** is one of the most important elements in any university/college or school. Authorities in charge of student result processing are burdened with a lot of other academic works like lecturing, research, marking of exams, etc., which tends to affect the timely, efficient, and accurate processing of results. Quite worrisome is the fact that these processes are carried out every academic session, putting the authorities in a continuous and ever-demanding cycle.

### Features of Online Result Processing Module

Exports the theory marks, internal assessment and practical exam marks digitally.

Minimizes the amount of manual input needed while processing result.

Choice to view free or paid result.

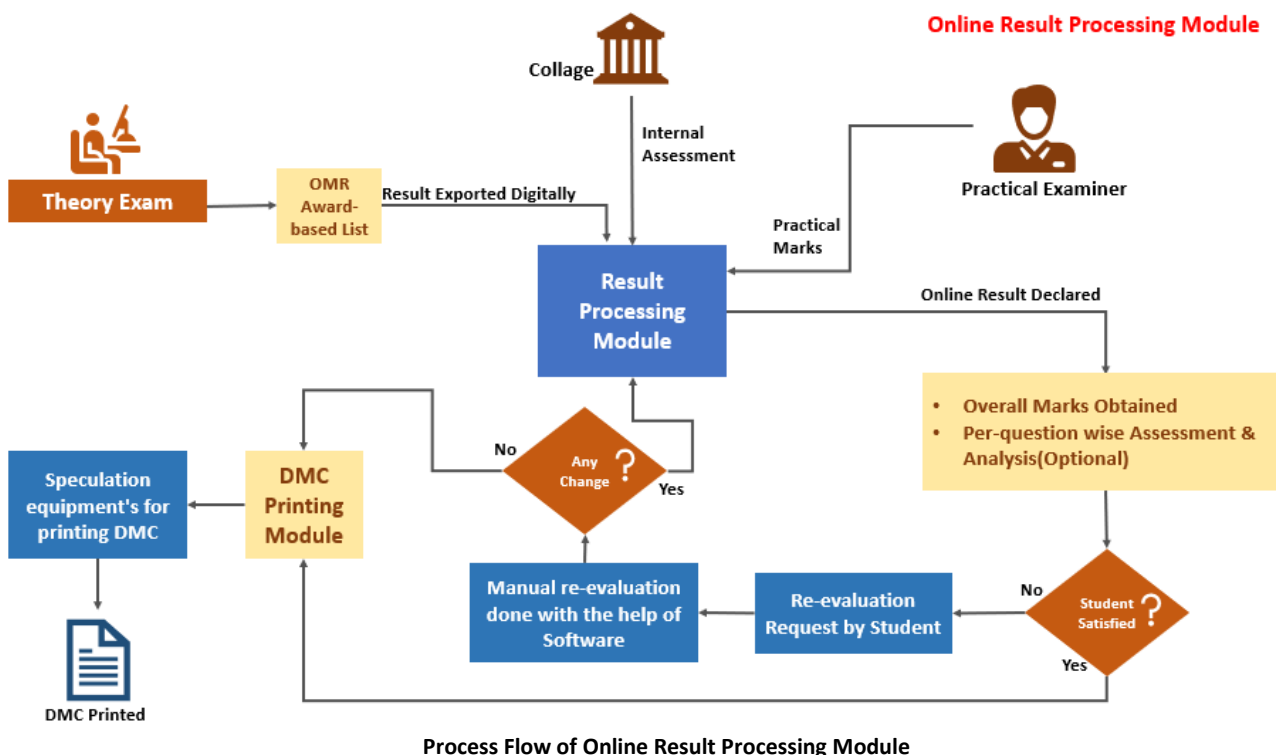

DMC printing Module

Re-evaluation module, if candidate desires.

Hassle-free and saves huge efforts.

## Benefits to the Organization

### **Quicker delivery of results**

Answer sheet evaluation and scoring happen instantly in the online result system allowing for quicker rank list generation.

### **Accurate results**

Reduced human intervention brings down chances of errors, and hence, the results delivered by the student mark analysis system tend to be accurate.

### **Analytics**

Clear and thorough analysis of results leads to a comprehensive report generation which is useful for all the stakeholders involved, including teachers, administrators and students.

### **Bias-free checking**

Reduced or nil human intervention in the student examination result processing system also makes it free from personal biases and prejudices, thereby delivering reliable, accurate and valid results.

### **Cost-effective and Scalable**

Irrespective of the volume of work, our services are scalable as it is intended to expand or shrink as required, the pricing model is usually flexible either per-transaction based or dependent on the number of users.

### **Transparency**

Digitization of the entire process makes the student result processing system transparent and objective.

### **Customizable**

The solution is highly customizable as per the ground-level requirements. Our core team goes into depth of the existing process and customize the solution to achieve the expected target.

### **Turn Around Time**

The Turn Around Time can eventually be reduced weeks to few days. A huge human effort can be saved by automation of internal process and hence, minimizing the delay.
