

What do we actually do?

We create Virtual Reality Live Streams of Events, Sports, Music Concerts, Rallies, Gatherings, Religious Rituals or Weddings etc. Everybody gets the front row to experience the best view.

And, We create Virtual Reality based experiences for Real Estate, Automobile, Showrooms, Architects, Retail Outlets, Studios, Interior Designers and many more, where your customers can walk inside your premises without even visiting you.

We also create immersive experiences for you and your customers of almost anything and everything that you want to get inside of, be it deep dive with dolphins, virtual meetings in cafe, understand the factory process, in-air dining or play games.

If you are still unsure of what change VR can bring to you,
we are available everywhere

What we want to discuss

We want to tell you that IPL opening ceremony or matches can be streamed in Virtual Reality and let every viewer hold the stage from literally anywhere (with an internet connection).

We will give you turnkey solution of the finest quality for this experience to unfold. With nothing more to download, your users can dive into another reality, virtually.

Recently, NFL live streamed its opening ceremony on Pepsi's app in Virtual Reality and it created a buzz around the world, though Pepsi was issuing passes to it. This kind of exercise has never been done in India so far.

If you are still unsure of what change VR can bring to you,
we are available everywhere
