# Welcome To THREAT EXPERT

Welcome to Threat Expert Cyber Solution Private Limited

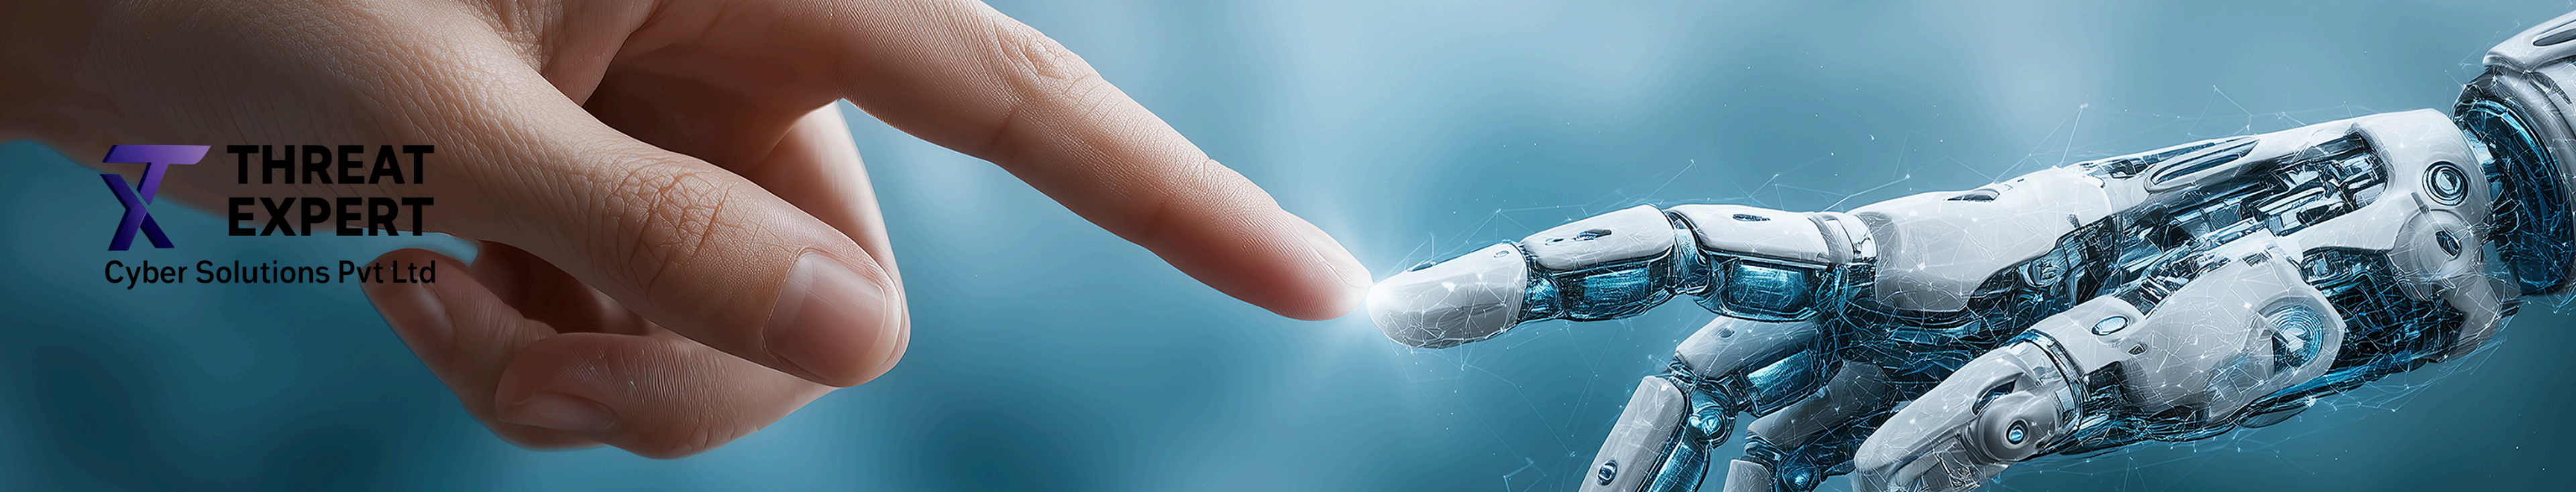

ThreatExpert Cyber Solution is a technology-driven cybersecurity and AI solutions company committed to building secure, intelligent, and future-ready digital systems. We specialize in delivering cybersecurity services, AI-powered solutions, secure development, and digital innovation for individuals, institutions, and organizations.

# About Us

At Threat Expert Cyber Solutions, we are a leading IT services startup company. Our comprehensive range of services is designed to empower businesses in the digital age while ensuring the highest level of security. We're building a culture of cyber resilience. Officially accredited by EC-Council USA, we offer India's most trusted and advanced training in Cybersecurity and Ethical Hacking. Empower your career with globally recognized certifications and industry-led expertise from the nation's premier cybersecurity institute.

# Our Vision

To be a trusted partner for businesses, providing cutting edge IT solutions and cybersecurity measures that drive growth, innovation, and a secure digital future

Our mission is to deliver exceptional IT services and cybersecurity solutions that enable businesses to thrive in the digital landscape. We are dedicated to understanding our clients' unique needs and providing tailored solutions that align with their goals and objectives

# Our Mission

# Our Services

## SECURE DESIGN & DEVELOPMENT

We build security into every stage of software development — from architecture and coding to testing and deployment. Our approach helps prevent vulnerabilities, ensure compliance, and deliver reliable, attack-resistant applications.

## WEBSITE SERVICES

We design, develop, and secure professional websites tailored to your business needs. Our services focus on performance, user experience, and strong security to ensure reliable and impactful online presence.

## TRAINING

We provide expert-led, hands-on training in Cybersecurity, Networking, Digital Forensics, and Cyber AI. Programs focus on practical skills, real-world labs, and certifications for students, professionals, and government organizations.

## ARTIFICIAL INTELLIGENCE

Artificial Intelligence enables machines to learn, analyze data, and make intelligent decisions. It helps automate tasks, enhance security, and improve efficiency across industries.

# Our Services

## Tech & Business Consultancy

We provide strategic technology and business guidance to help organizations improve security, efficiency, and growth. Our experts assess needs, design solutions, and support implementation for real-world results.

## Application Security

Application security protects software from attacks and unauthorized access across design, coding, testing, deployment, and maintenance. It focuses on preventing, detecting, and fixing vulnerabilities throughout the application lifecycle.

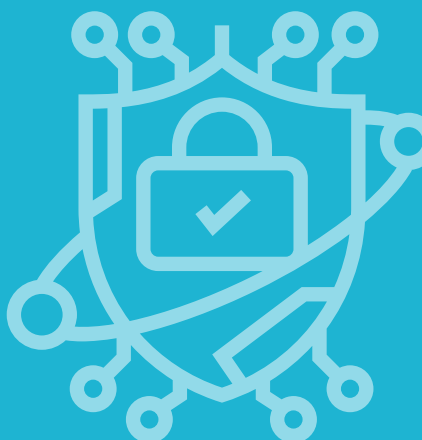

## Data Analysis

Data analysis transforms raw data into meaningful insights to support better decision-making. It helps organizations identify trends, improve performance, and strengthen strategic planning.

## Network Security

Our network security solutions protect your data, systems, and applications from threats and unauthorized access. We ensure confidentiality, integrity, and availability of information across all network touchpoints.

# Our SERVICES

## Red Team Assessment

Threat Expert Cyber Solution offers Red Team Assessment Services, simulating real-life cyberattacks to measure security controls. Our experts utilize social engineering, phishing, malware, and more to identify vulnerabilities and enhance your security posture.

## Cyber Drill

A cyber drill is a simulated cyberattack used to test an organization's preparedness. It replicates real threats like ransomware, phishing, or data breaches. Teams practice detecting, responding to, and containing the attack. It improves coordination, communication, and incident response capability.

## Cloud Security

Cloud computing delivers scalable, flexible, and cost-efficient IT resources over the internet.

It enables businesses to store data, run applications, and manage infrastructure without physical hardware.

Proper security measures are essential to protect cloud systems, applications, and data.

## Container Security

Containers are a popular and efficient way of deploying applications in the cloud, but they also introduce new security challenges and risks...

- Container security assessment
- Container security implementation
- Container security management

# PRODUCTS

## ED TECH

### BODH BOX

BodhBox is an industry-focused platform that builds job-ready skills in Cybersecurity, Networking, Digital Forensics, and Cyber AI through expert-led training, live projects, and hands-on labs. It delivers practical, real-world learning for students, professionals, and government organizations.

### SKILL XPLOIT

SkillXploit is a next-generation CTF platform for hands-on cybersecurity learning. Users build, play, and compete in real-world challenges to develop practical skills through live simulations and competitions.

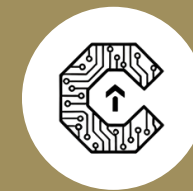

### FEED

Stay updated with the latest CTF challenges, cybersecurity insights, announcements, and community achievements – all in one place. Connect, share, and learn with the SkillXploit community.

## SECURITY SOFTWARE

### CHKSHU

Advanced network monitoring system that tracks traffic, detects anomalies, identifies cyber threats, and ensures optimal performance, uptime, and security across IT and OT environments.

### DEEPAKE DETECTION SYSTEM

AI-powered deepfake detection system that identifies manipulated audio, video, and images in real time, ensuring digital trust, media authenticity, and fraud prevention.

### CCTV SERVILLANCE

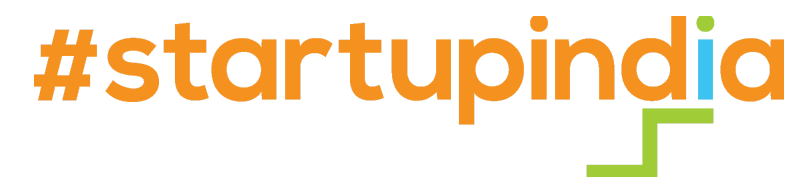

Smart CCTV surveillance system providing real-time monitoring, AI-based threat detection, incident recording, and remote access to enhance physical security and situational awareness.

We engaged Threat Expert Cyber Solutions for their consultancy services, and it was a game-changer for our business. Their detailed risk assessment and tailored recommendations helped us address critical vulnerabilities. The team was professional, efficient, and deeply knowledgeable. Five stars all the way!

The secure development training by Threat Expert Cyber Solutions was truly impressive. The trainers explained complex topics like secure coding and threat modeling in a way that was easy to grasp. The knowledge I gained has meaningfully improved my development processes. I highly recommend their courses
