Electronic Answer Sheet Evaluation

The Electronic Answer Sheet Evaluation is a revolutionary online platform enabling examination bodies to get the electronic evaluation done without any hassle of physical logistics of answer sheets with the help of modern-edge technology. The conventional process being followed by the universities is time-consuming and less secure. The Electronic Answer Sheet Evaluation process allows onscreen evaluation instead of physical evaluations of answer sheets. This system will convert the physical answer sheets into high-resolution digital copies with the help of high-speed and advance scanning equipment.

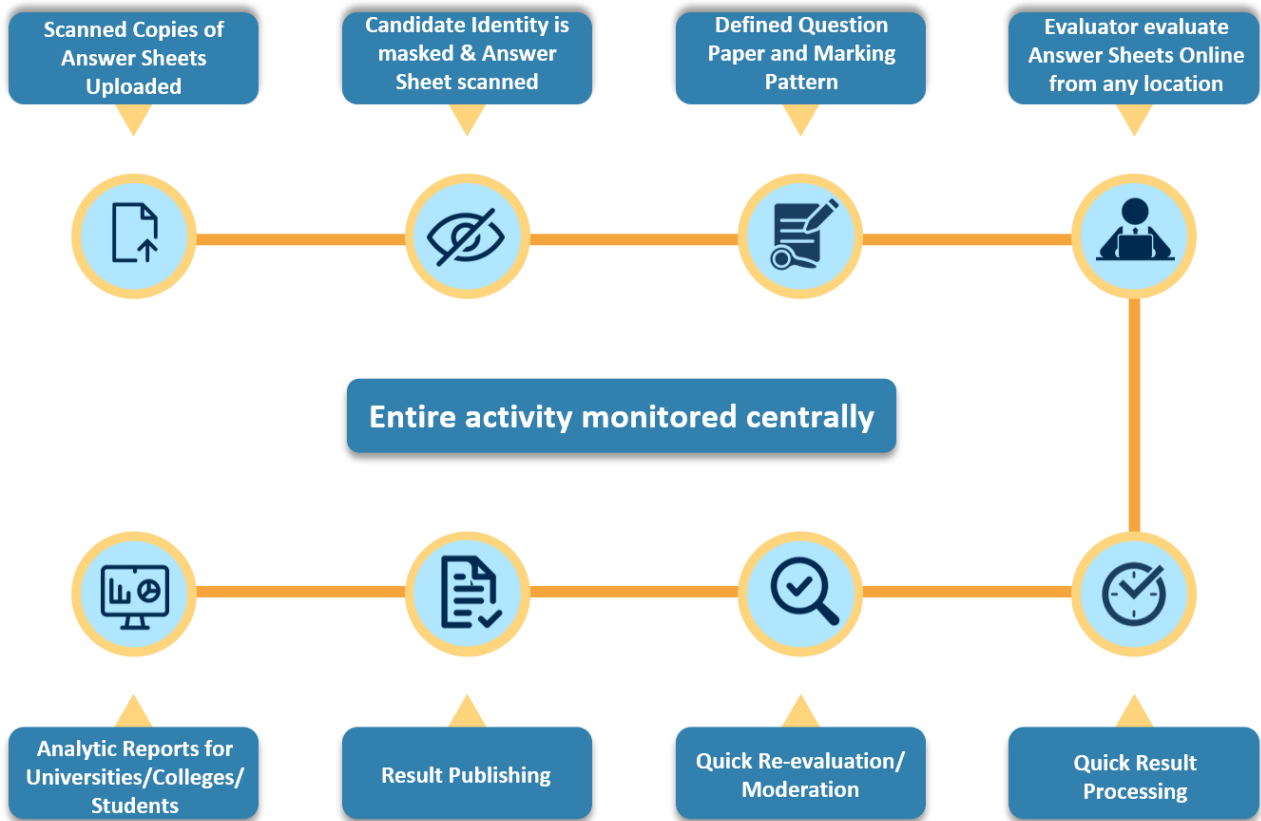

The evaluators will be able to evaluate the answer sheets using hi-tech and user-friendly software secured with login IDs and OTP. The EASE process not only saves the logistics cost but also save huge time in preparing the result.

Result Preparation Module

After the completion of the answer sheet evaluation, the next step is to prepare the result. For this purpose, a separate login is provided to the authorized faculty to enter the Practical and the Internal Marks of the student. The system automatically calculates the grace marks and combines marks obtained by each student in theory, practical, and internals to generate result draft in desired format, with zero errors and consequently saves huge time in the result preparation.

Flow of Electronic Answer Sheet Evaluation

Glimpse of Electronic Answer Sheet Evaluation

The screenshot shows the interface of the Examination Evaluation System. It displays a list of questions on the left, a central area for handwritten answers, and a right-hand panel for marking and status. The system includes features like auto-calculation of total marks and page numbering.

Question No. Selections: Points to the list of questions on the left.

Fictional Roll No.: Points to the roll number field at the top left.

Time Taken for Evaluation: Points to the time field at the top right.

Marking to be Assigned: Points to the marking panel on the right.

Status of Evaluation: Points to the status panel on the right.

Auto-Calculation of Total Marks: Points to the total marks field at the bottom left.

Page No.: Points to the page number field at the bottom right.

Handwritten Answer Content:

Features of Electronic Answer Sheet Evaluation

Integrated Evaluation for Auto-Import of Result Mark Sheet Printing

Lifelong Backup of Non-Evaluated & Evaluated of Answer Sheet

Easily accessible for rechecking and re-evaluation.

Various Analytical Report Generation for students/Institutes/Universities

Secure storage of the Answer Sheet in Digital format

Monitor entire evaluation activity with Online Dashboard

Removes Location Constraint for Evaluator

Details of the students/roll no. will be masked

Various types of Validation to prevent wrong marking

Maintains the originality of the answer sheet

Onscreen Annotations for Evaluation

High Speed & High-Resolution Scanner

Reduce the cost of the Logistics

Auto Calculation of Scores

Improve Transparency

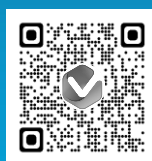

Moderation & Quick Result Processing

Top Notch Security Features

Customizable ground level requirements.
