# E-Transfer System for Officers

e-Transfer System for officers is an online application intended to give an online way to manage the transfer applications.

Veritos aimed to propose an e-Transfer System to access all the information about transfers through a computerised platform. This application empowers all the officers with a username and password to manage their profiles and the application. The Intelligent system Introduces the application for a programmed indication to eligible or ineligible areas picked by the applicants for transfer purposes.

The e-Transfer System improves the current transfer system by effortless processing of the existing transfer applications. This application brings about more transparency and precision in the employee transfers—accessibility of Dynamic Reporting(Incumbency report, station-wise qualified officer report, and so on). A communication medium is established to request or enquire in the office.

Admin — Will import officers data via HRMS or Manually Feed data along with Incumbency

Server

Evaluator — Evaluate the Officers based on various parameters.

- Login
- Profile Verification
- Communication to AG Office
- View the Eligibility Criteria of Transfer
- Eligible//Ineligible Stations
- Apply for Transfer Online
- Can Select the Choice of Station

Officer

Automatic Allocation of Stations as per the choice of officer based on various parameters like Eligibility, Available Station, Choice of Officer, Evaluation by the Evaluator,... etc.

BENEFITS TO THE ORGANIZATION

Zero Infrastructure cost
The proposed solution requires no hardware procurement, is Cost-viable and easy to implement cloud-based solutions.

Maintenance-Free
No need to stress out in case you encounter any software issue; it's our duty to determine the bugs before it reaches you.

Hassle-free Installation
Solution comes with pre-installed applications and ready to use hardware. No-hassle of installation.

Enhanced Security
Our cloud security standards are robust; we follow STRIDE, OWASP & GIGW standards. The application has already obtained Security Audit Clearance Certificate from CERT-IN empaneled company.

Cost-effective and Scalable
Irrespective of the volume of work, our services are scalable as it is intended to expand or shrink as required, the pricing model is usually flexible either per-transaction based or dependent on the number of users.

Minimal Implementation Time
As Soon as the requirements are freezed, the system can be made live in bare minimum time with required customizations. Being a cloud-based solution, implementation is comparatively faster.

Customizable
The solution is highly customizable as per the ground-level requirements. Our core team goes into depth of the existing process and customize the solution to achieve the expected target.

Turn Around Time
The Turn Around Time can eventually be reduced from several months to few days. A huge human effort can be saved by automation of internal office process and hence, minimizing the delay.
