Dashboard

Geo Tree Dashboard provides a comprehensive overview of tree data, including condition, height, girth, and precise location. This interactive tool allows for efficient monitoring and management of tree health and distribution.

Scan Qr Code:

Upon scanning, a form for entering tree details, including condition, height, girth, and location, will automatically open.

This streamlined process ensures quick and accurate data collection for each tree.

To enter tree details, record information such as the condition, height, girth, and location of each tree. Present these details clearly to provide a comprehensive understanding of the tree's characteristics.
