Role of Technology in Service Delivery

MANUAL MODEL

TECH-BASED MODEL

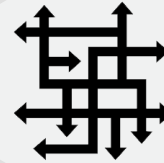

CHALLENGES IN PUBLIC SERVICE DELIVERY

Maintaining physical records of Applicant

High risk of Human Error due to increasing number of new registrations and retention

Uneven footfall of applicants causes delay in processing of applications

Loss of revenue due to cumbersome process of retention & travel hassle

Less Transparency and no track over application movement within office

No centralized access due to non-integrated solution

CHALLENGES IN PUBLIC SERVICE DELIVERY

Separate modules for application and processing

No foolproof method to prevent Duplicate/Tempered application

Hassle of procurement of product/material/services from multiple vendors

No reliable method of Verification of documents

Lack of consultancy of Technological Advancements and future upgradations

Supply Report to firm for compliance

Turn Around Time (TAT)

- ❑ Physical Movement of files from one table to another **cause delay in action.**
- ❑ Process reengineering helps in **identification of bottlenecks**
- ❑ With the help of TECHNOLOGY, 70% of processes can be **automated/avoided** which helps in drastic **improvement in Turn Around Time**
- ❑ Ideally opting an automated system may reduce the average TAT from **7 days to 3 hours** without any additional Manpower.
- ❑ Delay beyond TAT cause an **escalation to Higher Authorities.**
- ❑ **Accountability and Ownership** of work will increase among the staffs.
- ❑ If more and more councils are on same platform then inter-council verification Turn Around Time can also be **reduced by 80%.**
